Re: Grade Span for Opening New High School  
Timeline for Transitioning Students

I am recommending we open the new high school during the 2021-2022 school year with freshman, sophomore and junior classes. Students in their senior year will remain in their current school for the 2021-2022 school year. I am also recommending we offer students in their junior year during the 2021-2022 school year the option to remain at their current school for both their junior and senior years without District provided transportation.

I am also recommending the following timeline for transitioning students to their newly assigned schools after new boundary lines have been approved:

**2020-2021 school year-** K-8 students will transition to their new schools

**2021-2022 school year-** 9-11 students will transition to their new schools
